SKILLS

- Kotlin
- Android SDK
- HTML
- CSS
- JavaScript
- Git
- Java
- C
- C++
- DBMS

PROJECTS

- **Xperia Lockscreen Clock** - An android application that utilizes substratum theme engine on devices running custom roms based on Android 7.0+ to change the device default lockscreen clock style to match the ones found in Xperia devices. It comes with a dashboard for easy access to information such as list of supported roms, faqs, about and contact details for receiving support.
- **Ice** - An android application that utilizes substratum theme engine on devices running custom roms based on Android 7.0+ to change various UI elements for system and 3rd party apps to a pure white color based interface.
